What's New on the Market

All lettuce now offered by local grocers is being shipped in from California. It is selling at 15 cents a head and is of excellent quality. Rutabagas which are remarkably free from worms are being offered by local stores at 5 cents a pound. Jap oranges are selling at 30, 40 and 50 cents a dozen. These oranges are imported from Japan and have a very pleasing flavor which is different from any of the oranges grown in the United States. The Jap variety are somewhat smaller than the other oranges. California oranges are being offered at 35, 40, 50 and 60 cents a dozen, depending upon the size. The market on eggs here remained at from 28 to 42 cents a dozen retail today. Local stores are offering from 34 to 35 cents a dozen while shippers are offering 33 cents per dozen.

His automobile figured in a crash at the corner of Chemeketa and Summer streets yesterday, C. C. Kayes, of route 3, told the police. There was some damage, he said.

Night Desk Sergeant Ralph Davis found business rather quiet at the police station last night. No complaints of importance were received and only two men were furnished bonds.

The World's First Vibrationless Motor!

The fact that the Rickenbacker motor has no period of vibration has set the entire motor car industry agog! Never before has this been accomplished. Never before has the fundamental thought been worked out. Yet here it is and like all great big achievements the principle itself is very simple. The crankshaft of the Rickenbacker motor is provided with a double flywheel—one fore and one aft. The introduction of these two flywheels absolutely eliminates all vibration at all speeds. Thus you are given an entirely new riding sensation which you have never experienced before. Other cars ride smoothly, very smoothly, but none so smoothly, at all speeds, as the Rickenbacker. And in addition to that it is one of the fastest and smartest cars on the road. Come in and let us give you a demonstration.

Organization Builds Success

A flexible engine for Winter motoring

Your motor will start readily and operate flexibly, in winter, if you use an oil that stays fluid at low temperatures. The battery troubles, worn bearings and scored cylinders, experienced in winter, are simply evidence that the motor is bound with congealed oil and deprived of lubrication.

Zerolene Stays Fluid in Winter

Zerolene No. 1, No. 3 and No. 5, which are good cold test oils, move freely in winter with the action of the motor. They give a continuous flow of lubricant of the proper "oiliness" to the pistons, connecting rods and crank-case shaft bearings, and save batteries.

For safe cold weather lubrication, consult the Zerolene Chart at garages and service stations.

STANDARD OIL COMPANY (California)

more power & speed ~ less friction and wear ~ thru Correct Lubrication
